AGENDA

Dyslipidemia in Primary Care: Implications of the 2021 CCS Dyslipidemia Guidelines

- The following topics will be covered during this program
- ✓ What's New in Primary Prevention
 - *Who and How to Screen*
 - *Treatment Approach for Primary Prevention Patients*
- ✓ The Role of non-HDL-C, apoB, and Lp(a) in Improving Risk Assessment
- ✓ Coronary Artery Calcium Scoring: When is it useful
- ✓ What's New in Secondary Prevention
 - *Thresholds vs. Targets: When to intensify treatment*
 - *Which patients derive the most benefit*
 - *Managing persistent risk beyond LDL-C*
- ✓ Integrating Guidelines into Clinical Practice

LEARNING OBJECTIVES

Upon completion of this activity, participants will be able to:

- Explain the key updates to the 2021 CCS Dyslipidemia Guidelines for primary and secondary prevention
- Identify those patients who would benefit from additional therapy beyond statins to reduce CV risk
- Appropriately apply the new 2021 CCS Dyslipidemia Guideline recommendations into routine clinical practice

This one-credit-per-hour Group Learning program has been certified by the College of Family Physicians of Canada and the Ontario for up to 1.0 Mainpro+ credits.

This program has received an educational grant and in-kind support from Amgen Canada
