

Celebrating 30 Years.

Built on Your Referrals.

Thank You.

This past March 11th marked 30 years of Kinetic Konnection supporting patients and healthcare professionals across Windsor and Essex County.

Since 1996, we have worked alongside physicians, nurse practitioners, and community healthcare allies to support patients across a range of needs beyond diagnosis, with a focus on function, recovery, and independence.

Each referral represents a shared objective: timely, appropriate support that helps patients maintain mobility, improve stability, and progress through recovery with confidence. Our role remains focused on providing practical solutions, including orthopedic bracing, medical compression, and recovery tools that support functional outcomes across the continuum of recovery.

We hope you will join us for an evening recognizing and thanking our referring healthcare professionals.
